

DARE CHALLENGE

DAY 6

Today's task for you is to find the best method for conducting surveys/interviews on specific topic

1.

In the same teams discuss and decide what kind of specific information you would like to find out from the locals. It can be phone number, shoe size, favourite drink etc.

5-10 min

2.

Come up with two different methods how to obtain this information from people, e.g. if you choose to get phone numbers, you can either tell people 1) their phone number can be drawn in a lottery for winning a car; 2) you will call to ask them on a date.

20-25 min

3.

You have to interview at least 20 people (10 the first way, 10 the second).

Collect your results and prepare statistics.

You will have to present your results for everyone (which method works better, possible reasons why).

1 hour
